NAREN A

Software Engineer

Portfolio | LinkedIn | GitHub | a.naren1308@gmail.com | +91 86102 67450 | Madurai, Tamil Nadu

I like building things that are difficult to build and useful in the real world. Most of my work sits around AI systems and the engineering needed to take them from an idea to something people can actually use. I enjoy owning the messy parts too - figuring out what to build, making it work, and fixing it when reality disagrees.

Education

PSNA College of Engineering and Technology 2023 - 2027

B.E. Computer Science and Engineering **CGPA: 8.01**

Experience

Hyle Global - Software Engineer (AI) Intern Jun 2026 - Aug 2026

- **Lead software architecture for Cognis**, an event-driven cognitive system that observes AI-interface interactions, models user intent, and surfaces contextual guidance through an in-browser AI co-pilot.
- **Architected Cognis around 23 typed domain events across 7 cognitive domains**, with a synchronous EventBus, cross-context event bridging, durable event persistence, and an AI enrichment layer for workflow-aware guidance.

Dot Com Infoway - AI Engineer Intern Jan 2026 - Jun 2026

- **Spearheaded DIYA**, an AI content automation workflow that transformed website data into structured, multi-platform content strategies, **eliminating 15–20 hrs/week** of manual content work.
- **Automated the workflow from fragmented website inputs to publish-ready content strategies**, replacing repetitive manual analysis and handoffs with a repeatable AI-driven generation pipeline.

Projects

AI Assessment Creator GitHub

- **Architected a multi-LLM orchestration backend** with Node.js and Express, implementing provider failover and capacity-aware routing across Groq, OpenRouter, and Cohere.
- **Decoupled 45+ second AI workloads from the HTTP lifecycle** using BullMQ and Redis, enabling persistent job recovery, real-time WebSocket progress, and Zod-validated chunk-level output repair.

Scribe - AI Branding SaaS Website

- **Launched a full-stack AI SaaS** with Next.js, Supabase, and serverless APIs that generated **INR 10,000+ revenue and 100+ users within 5 hours**, automating website analysis, brand extraction, and multi-platform content generation.
- **Integrated a resilient multi-provider AI pipeline** spanning **4 LLM providers** with parallel Cheerio and Microlink extraction, reducing dependence on heavy browser automation while improving extraction reliability.

Harmony Aura - Predictive Intelligence Platform GitHub

- **Architected a predictive maintenance pipeline** using 1D-CNNs and Firebase to process **10,000+ time-series telemetry sequences** for machinery fault classification across vibration, pressure, and thermodynamic signals.
- **Correlated worker biometrics with machine state** through a digital-twin risk model, enabling real-time safety scoring and **sub-second anomaly alerts** across worker and machinery signals.

Technical Skills

Languages: Python, Java, SQL, TypeScript, JavaScript

ML / AI: PyTorch, TensorFlow, Scikit-Learn, XGBoost, Transformers, RAG, Agentic AI, Multi-Agent Systems, LangChain, LangGraph, Recommender Systems, Computer Vision

AI Systems: LLM Orchestration, Context Engineering, Multimodal AI, Embeddings, Vector Search

Backend & Infrastructure: Node.js, Express.js, FastAPI, REST APIs, WebSockets, Redis, BullMQ, PostgreSQL, MongoDB, Docker, Git, Linux

Achievements

- **Amazon ML Challenge 2025:** Ranked #**892 among 80,000+ participants** and #**1 at college**.
- **SaaSathoN'26 - Winner:** Won 36-hour startup hackathon at SSN University, Chennai.
- **AURISTRA'26 - Winner:** Won 48-hour hackathon at Takshashila University, Tindivanam.
- **Hackcelerate'26 - First Runner-Up:** 24-hour hackathon at SRMIST, Chennai.
- **L&T TECHgium 9th Edition - VPOC Round:** Advanced to the VPOC (Pre-Grand Finale) round.
- **T-Hub & WSA Recognized Innovation:** ECHO recognized for innovation in hearing-health technology.
